VENKATESH MAMIDALA

ENTERPRISE INFRASTRUCTURE & PLATFORMS TECHNICAL LEAD

Storage | Virtualization | Cloud Infrastructure | Data Protection | Disaster Recovery & Infrastructure Strategy

India | venkatesh.technical@gmail.com | linkedin.com/in/venkatesh-mamidala-b25a4252

PROFESSIONAL SUMMARY

Enterprise Infrastructure and Platforms Technical Lead with 11+ years of IT experience, including 2.5+ years in technical leadership across enterprise storage, data protection, virtualization, cloud infrastructure, and production services. Currently leading Storage and Backup infrastructure operations at AHEAD, providing technical direction, engineering oversight, and operational governance across complex, multi-customer environments. Brings a combination of hands-on infrastructure depth, technical escalation leadership, service delivery ownership, and cross-functional coordination.

LEADERSHIP & INFRASTRUCTURE PORTFOLIO

- Technical ownership across 300+ storage systems supporting 50+ customers.
- Approximately 60–72 PB of directly administered storage capacity, with broader team-level service delivery accountability approaching 200 PB.
- Operational oversight across Commvault, Veeam, Cohesity, Rubrik, and IBM TSM data protection environments.
- Focus areas include production reliability, incident and problem management, disaster recovery readiness, capacity and performance management, engineering governance, and automation.

PROFESSIONAL EXPERIENCE

AHEAD | Technical Lead – Infrastructure (Storage & Backup)

April 2026 – Present

- Lead enterprise Storage and Backup infrastructure operations, providing technical direction, engineering oversight, and operational leadership across distributed teams.
- Own technical delivery, operational performance, resource planning, escalations, and engineering accountability across customer environments.
- Drive production incident management, complex technical investigations, root cause analysis, and corrective-action tracking.
- Oversee storage availability, capacity, performance, replication, backup operations, and disaster recovery readiness.
- Coordinate with architecture, application, virtualization, network, cloud, vendor, and customer teams to resolve complex infrastructure issues and manage service risks.
- Establish and reinforce operational standards for incident acknowledgement, escalation management, SLA/OLA compliance, documentation, and service quality.
- Developed five infrastructure health-check scripts using Python and PowerShell for NetApp, Dell, Brocade, Cisco, and Pure platforms.

AHEAD | Senior Systems Engineer – Infrastructure

April 2024 – March 2026

- Managed enterprise storage and data protection platforms across customer environments, supporting production availability and operational stability.
- Delivered storage administration, troubleshooting, performance analysis, capacity management, and infrastructure lifecycle activities.
- Supported complex incidents, technical escalations, platform upgrades, migrations, replication, and disaster recovery operations.
- Partnered with customer stakeholders and cross-functional engineering teams to address infrastructure risks and maintain service availability.

CDI LLC | Senior System Engineer / Solutions Engineering

November 2023 – April 2024

- Developed infrastructure solution proposals, architecture reviews, high-level designs, requirements matrices, and technical use cases.
- Contributed to large-scale storage architecture across data centers and private cloud environments.
- Worked with software-defined, object, and file storage solutions and cloud-integrated backup environments.
- Supported IBM SoftLayer, NetApp ONTAP Select, VMware vSphere 6.x, and NetApp 7-Mode and Cluster-Mode environments.
- Created technical documentation, implementation procedures, and standard operating procedures.

VELTRIS | Storage Engineering, Migration & Data Protection

May 2020 – November 2023

- Delivered enterprise NetApp storage migration projects, including 7-Mode to Cluster-Mode, EMC-to-NetApp, and 7-Mode to 7-Mode migrations.
- Executed migration activities using NetApp 7MTT and supported disaster recovery projects.
- Supported enterprise storage, SAN, and data migration activities across NetApp, IBM, and EMC platforms.
- Worked with IBM SoftLayer software-defined storage, object and file storage, and Brocade SAN environments.
- Supported backup migration, storage administration, troubleshooting, and customer-facing operational activities.
- Prepared technical procedures, migration plans, and standard operating procedures.

CALSOFT | Storage and VMware Migration & QA Engineer

November 2018 – November 2019

- Worked on storage and VMware migration projects, testing, and quality assurance.
- Supported infrastructure validation, troubleshooting, and migration-related verification activities.

IBM | Storage Engineer
May 2015 – November 2018

- Supported enterprise storage infrastructure and associated production operations.
- Performed storage administration, troubleshooting, and customer support activities.

CDI LLC experience is presented separately as provided; the resume notes that CDI experience was consolidated under AHEAD following an organizational merger. Veltris experience consolidates Wavelabs Technologies and Westagile IT Labs following organizational mergers.

TECHNICAL EXPERTISE

Enterprise Storage: NetApp ONTAP, ONTAP Select, Dell PowerMax, EMC VMAX, VNX, Unity, Isilon/PowerScale, IBM Storage, Pure Storage

Data Protection: Commvault, Veeam, Cohesity, Rubrik, IBM TSM, EMC DMZ

Storage Protocols & Fabric: SAN, NAS, DAS, Fibre Channel, iSCSI, NFS, SMB/CIFS, SnapMirror, replication, Brocade SAN

Virtualization & Cloud: VMware vSphere, IBM SoftLayer, private cloud, cloud-integrated storage and backup environments

Automation: Python, PowerShell; five platform-specific health-check scripts for NetApp, Dell, Brocade, Cisco, and Pure

Infrastructure Operations: Production support, incident and problem management, RCA, capacity and performance management, DR readiness, recovery validation, vendor coordination, SLA/OLA governance, service delivery

DATA PROTECTION PLATFORM PORTFOLIO

- **Commvault:** 18 CommServe environments
- **Veeam:** 98 instances
- **Cohesity:** 14 systems
- **Rubrik:** 29 systems
- **IBM TSM:** 4 environments

CERTIFICATIONS

- NetApp – 8 certifications spanning NCDA through Hybrid Cloud Professional level
- Nutanix – Nutanix 6.5 MCP
- Veeam – Veeam Professional
- Dell EMC – Dell EMC Professional
- VMware – VMware Professional
- Data Analysis Using Python
- Data Science for Business – Level 1
- Enterprise Design Thinking Practitioner
- Enterprise Design Thinking Co-Creator

EDUCATION

Master of Technology (M.Tech) – Bio Chemical Engineering
Jawaharlal Nehru Technological University (JNTU), Hyderabad
